ACER PALMATUM ORANGE FLAME

**Orange Flame
#6**

Considered one of the best maples for fall color, **Orange Flame Japanese Maple** showcases orange in every season. New spring growth emerges orange, then matures to green. The tree continues to push new foliage that stands out like flames against mature leaves throughout summer. Fall color is vibrant orange and red, followed by orange winter bark. This medium sized, upright grower tolerates full sun in northern locations but benefits from partial shade in hotter climates.
